CAREER OBJECTIVE

Frontend developer with a history of working in IT industry and a brain full of creativity and new ideas. Willing to be a part of an organization where I can fully utilize my skills and make a significant contribution to the success of the employer and at the same time enhance my skills and knowledge.

WORK EXPERIENCE

Frontend Developer / Classic Informatics

Nov 2022 – Jul 2023

- Developing responsive and user-friendly web interfaces using HTML, CSS, ReactJS and JavaScript.
- Implementing and integrating APIs to fetch and display data from server-side services.
- Utilizing version control systems like Git for collaborative development and code management.
- Staying up-to-date with the latest front-end development trends, best practices, and emerging technologies.
- Developing and maintaining the user interface using ReactJS.

Frontend Developer / Tata Consultancy Services

May 2019 – Jun 2022

- Worked as a frontend developer using HTML, JavaScript, CSS and React JS.
- Created test cases and performed API testing to evaluate the performance using Postman.
- Worked with UI/UX design team to improve existing application to increase engagement.
- Worked closely with an agile team and provided end-to-end solutions to clients.
- Performed API integration and testing to evaluate the performance of the product.

Business Analyst / Tata Consultancy Services

Dec 2018 – May 2019

- Worked as business analyst for a HCM company that brings together real-time payroll, HR, benefits, time reporting, talent and workforce management.
- Integrated and tested exports between client and 3rd party vendor systems using IBM Sterling B2B Integrator and Map Editor.
- Worked directly with client's customers and handled projects end-to-end from initial kickoff to production deployment.

PROJECTS

Project Name: Aertrip

Role: Front End Developer

Technology: ReactJS, JavaScript, Material UI

Aertrip application is designed to make travel planning, booking and organizing as easy and enjoyable as the travel experience itself. My role in this project was to add various functionalities using ReactJS as well as solve complex performance problems and architectural challenges. Worked with UI/UX design team to improve existing application to increase engagement.

Project Name: Wiley Reader

Role: Front End Developer

Technology: ReactJS, JavaScript/Typescript, Material UI

Wiley reader is a product of Wiley Publications that allows people to read books online. Users can access books wherever they are, can enjoy notes, highlights, and bookmarks sync with the web experience. I worked as a frontend developer on this project. My responsibilities included utilizing advanced techniques in order to provide optimal UI/UX experience to the user, participating in design and UX experience and weekly interactions with the client.

Project Name: Dayforce

Role: Front End Developer

Technology: JavaScript, ReactJS, CSS, Rest APIs

Dayforce is an HCM tool that has multiple modules such as HR, payroll, workforce management and talent management. I worked as a frontend developer. Contributed and participated in new feature product specification. Ensured that content met or exceeded client requirements. Worked with REST APIs and performed API testing using postman. Handled client's end customers and delivered the project as per their requirements.

Project name: Click and Buy Webstore

Role: Self Developed

Technology: ReactJS, Typescript, Redux, CSS

Minimal online shopping store. The goal of this project was to establish a robust and user-friendly online shopping store that offers a wide range of products to customers. The app was made using vite, where I implemented basic CRUD operations along with CSS styling.

Project Name: Recipe Search Plus

Role: Self Developed

Technology: Vanilla JS, CSS, HTML

Simple recipe search app which helps user to search different recipes for different dishes. The app was made using plain vanilla JavaScript and a free recipe search API.
